DETAILED DESCRIPTION

At page 20, line 1, please amend the section heading as follows:

~~CLAIMS~~ WHAT IS CLAIMED

Please delete the Abstract paragraph on the front page of the PCT publication and replace it with the following paragraph. Accordingly, after the last page of the subject application, please insert a separate page as follows:

ABSTRACT

A method, system, and computer program product for informing an application server whether or not a mobile subscriber is present on a mobile telecommunication network includes a first step for sending a first distinctive signal from the mobile subscriber to the mobile telecommunication network, intended for the mobile subscriber. A second step determines a present or not present binary state according to a reaction of the mobile telecommunication network to the first signal. A third step communicates to the application server the state determined in the second step.
